SECTION 9 SANTEE LAKES RECREATION PRESERVE

9.1 INTRODUCTION

Santee Lakes Recreation Preserve (Park) is a beautiful recreational facility owned and operated by Padre Dam Municipal Water District. It is located strategically within San Diego County. Its seven lakes, which contain approximately 82 surface acres of water, were formed by sand and gravel mining in the dry stream bed of Sycamore Canyon as part of the District's original water reclamation program.

In the early 1960's, the District converted the Lakes to recreational use to demonstrate the concept of water reuse. Its purpose was also to gain public acceptance of reclaimed water for recreational, agricultural, irrigation, and industrial applications.

Today, the Park provides daytime recreation, overnight camping, picnicking, fishing, and special events.

9.2 AUTHORITY AND ENFORCEMENT OF PARK REGULATIONS

9.2.1 Authority

The California Water Code authorizes the District to govern the public use of its facilities, and these rules and regulations are established pursuant to this code for the protection of District property and public safety.
